Disclosure: This illustration shows the minimum adjusted income for a single individual investing at age 55 assuming no withdrawals for 10 years. It utilizes B-share contracts and does not apply state variations. It does not account for any potential step-ups that could generate a higher income, especially for those benefits that allow a higher percentage of equity exposure, as well as the benefits that allow stacking. Current as of January 2023, withdrawal percentages and roll-up rates are subject to change. Although most products are represented, other versions or surrender periods from a carrier could produce a different rate. **Income Rate**: Individual investing at 55, benefit base increasing by guaranteed roll up rate, or deferral period, then withdrawing money at 65 for life at income rates. Showing income rate from initial investment. **Possible Decrease**: Income rate can decrease if account value is depleted

This report and its contents are based on current publicly available information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. Disclosure: This illustration shows the minimum adjusted income for a single individual investing at age 55 assuming no withdrawals for 10 years. It utilizes B-share contracts and does not apply state variations. It does not account for any potential step-ups that could generate a higher income, especially for those benefits that allow a higher percentage of equity exposure, as well as the benefits that allow stacking. Current as of January 2023, withdrawal percentages and roll-up rates are subject to change. Although most products are represented, other versions or surrender periods from a carrier could produce a different rate. Income Rate: Individual investing at 55, benefit base increasing by guaranteed roll up rate, or deferral period, then withdrawing money at 65 for life at income rates. Showing income rate from initial investment. Possible Decrease: Income rate can decrease if account value is depleted
