**Disclosure:** This illustration shows the minimum adjusted income for a single individual investing at age 60 assuming no withdrawals for 5 years. It utilizes B-share contracts and does not apply state variations. It does not account for any potential step-ups that could generate a higher income, especially for those benefits that allow a higher percentage of equity exposure, as well as the benefits that allow stacking. Current as of July 2020, withdrawal percentages and roll-up rates are subject to change. Although most products are represented, other versions or surrender periods from a carrier could produce a different rate. **Income Rate:** Individual investing at 60, benefit base increasing by guaranteed roll up rate, or deferral rate, then withdrawing money at 65 for life at income rates. Showing income rate from initial investment. **Possible Decrease:** Income rate can decrease if account value is depleted
